

# Automation Test Engineer

PebblePad is expanding! We build big complex web applications and this is an amazing opportunity to join the top-notch team behind our award-winning software.

## Job Description

About you – We're looking for someone with the potential to do great things. We need you to be a strong collaborator and able to succeed in a fast-paced environment. You'll need to have strong experience in both automated and manual testing, at least two years' experience working with end-to-end tests along with the requirements below.

## Requirements

- MUST have strong experience with Selenium, C# (or F#), and database platforms such as PostgreSQL and MongoDB
- MUST have experience creating test suites to simulate application load
- MUST have experience web application security testing
- MUST have experience writing/approving and executing manual test runs
- Excellent written and verbal communication skills with the ability to communicate findings articulately.
- You can demonstrate evidence of problem solving and developing creative ideas to support company growth
- You have a results-oriented approach to all work with a continuous improvement mindset
- Be comfortable preparing and running training/workshop sessions

## What you'll be doing

- Working on improving our load testing infrastructure with the help of our development teams
- Getting involved in the planning of our dev teams work to ensure a high level of quality in new features through automated and manual testing where applicable
- Working closely with our QA team to improve our automated testing processes
- Analysing product requirements and producing/approving test plans collaboratively with your team

Why PebblePad? We are a multi award-winning company – big enough to operate globally, but small enough to value every team member within a culture that's inclusive, fun and vibrant.
